#### **Crime Scene Photography** - Edward M. Robinson - 2010-02-03

Crime Scene Photography is a book wrought from years of experience, with material carefully selected for ease of use and effectiveness in training, and field tested by the author in his role as a Forensic Services Supervisor for the Baltimore County Police Department. While there are many books on non-forensic photography, none of them adequately adapt standard image-taking to crime scene photography. The forensic photographer, or more specifically the crime scene photographer, must know how to create an acceptable image that is capable of withstanding challenges in court. This book blends the practical functions of crime scene processing with theories of photography to guide the reader in acquiring the skills, knowledge and ability to render reliable evidence. Required reading by the IAI Crime Scene Certification Board for all levels of certification Contains over 500 photographs Covers the concepts and principles of photography as well as the "how to" of creating a final product Includes end-of-chapter exercises

#### **Astro-Imaging Projects for Amateur Astronomers** - Jim Chung - 2015-07-09

This is the must-have guide for all amateur astronomers who double as makers, doers, tinkerers, problem-solvers, and inventors. In a world where an amateur astronomy habit can easily run into the many thousands of dollars, it is still possible for practitioners to get high-quality results and equipment on a budget by utilizing DIY techniques. Surprisingly, it's not that hard to modify existing equipment to get new and improved usability from older or outdated technology, creating an end result that can outshine the pricey higher-end tools. All it takes is some elbow grease, a creative and open mind and the help of Chung's hard-won knowledge on building and modifying telescopes and cameras. With this book, it is possible for readers to improve their craft, making their equipment more user friendly. The tools are at hand, and the advice on how to do it is here. Readers will discover a comprehensive presentation of astronomical projects that any amateur on any budget can replicate - projects that

utilize leading edge technology and techniques sure to invigorate the experts and elevate the less experienced. As the "maker" community continues to expand, it has wonderful things to offer amateur astronomers with a willingness to get their hands dirty. Tweaking observing and imaging equipment so that it serves a custom purpose can take your observing options to the next level, while being fun to boot.

#### **The Hot Shoe Diaries** - Joe McNally - 2009-03-03

When it comes to photography, it's all about the light. After spending more than thirty years behind the lens—working for National Geographic, Time, Life, and Sports Illustrated—Joe McNally knows about light. He knows how to talk about it, shape it, color it, control it, and direct it. Most importantly, he knows how to create it using small hot shoe flashes. In The Hot Shoe Diaries, Joe brings you behind the scenes to candidly share his lighting solutions for a ton of great images. Using Nikon Speedlights, Joe lets you in on his uncensored thought process—often funny, sometimes serious, always fascinating—to demonstrate how he makes his pictures with these small flashes. Whether he's photographing a gymnast on the Great Wall, an alligator in a swamp, or a fire truck careening through Times Square, Joe uses these flashes to create great light that makes his pictures sing.

#### **Scripting Death** - Mara Buchbinder - 2021-05-04

How the legalization of assisted dying is changing our lives. Over the past five years, medical aid-in-dying (also known as assisted suicide) has expanded rapidly in the United States and is now legally available to one in five Americans. This growing social and political movement heralds the possibility of a new era of choice in dying. Yet very little is publicly known about how medical aid-in-dying laws affect ordinary citizens once they are put into practice. Sociological studies of new health policies have repeatedly demonstrated that the realities often fall short of advocacy visions, raising questions about how much choice and control aid-in-dying actually affords. Scripting Death chronicles two years of ethnographic research documenting the implementation of Vermont's 2013 Patient Choice and Control at End of Life Act. Author Mara Buchbinder weaves together stories collected from patients, caregivers, health care providers, activists, and legislators to illustrate how they navigate aid-in-

dying as a new medical frontier in the aftermath of legalization. Scripting Death explains how medical aid-in-dying works, what motivates people to pursue it, and ultimately, why upholding the “right to die” is very different from ensuring access to this life-ending procedure. This unprecedented, in-depth account uses the case of assisted death as an entry point into ongoing cultural conversations about the changing landscape of death and dying in the United States.

**DSLR Cinema** - Kurt Lancaster - 2018-02-19

The DSLR cinema revolution began over ten years ago. Professional filmmakers, students, video journalists, event video shooters, production houses, and others jumped at the opportunity to shoot cinematic images on these low budget cameras. The first edition of the book mapped the way focusing exclusively on DSLRs. This new edition shows how you can create stunning cinematic images using low budget cinema cameras, from iPhones to the C200. The author examines new cameras and new projects as filmmakers shoot action movies with the Panasonic GH5, craft personal stories with Blackmagic's Pocket Cinema Camera, make documentaries and short films with the Canon C100 Mark II, and create music videos with the 5D Mark IV. This book, like the previous edition, takes the wisdom of some of the best shooters and empowers you to create visually stunning images with low budget cinema cameras. It includes six all new case studies, as well as updated examples from short films and documentaries. This book contains the essential tools to make you a better visual storyteller. FEATURES An examination of the creative and technical choices filmmakers face—everything from why we move cameras to

shooting flat in order to widen the dynamic range of cameras Case studies from documentary filmmakers, news shooters, fiction makers, a visual anthropologist, and recent film school graduates An updated list of gear for low-budget filmmakers, including a section on what to look for in the gear you need to shoot and edit your projects

**Facial Plastic and Reconstructive Surgery** - Brian J.-F Wong - 2020-11-02

This newly expanded and updated second edition helps facial plastic surgery fellows and advanced residents in otolaryngology/head and neck surgery find the answers they're looking for when preparing to take the American Board of Facial Plastic and Reconstructive Surgery exam. Covering core content relevant to the ABFPRS board exam, this guide emphasizes key facts and clinical pearls essential to exam success and includes hypothetical exam questions and relevant surgical and clinical images. Written by leader in the field and the Director for the facial plastic surgery fellowship program at the University of California Irvine, this textbook book discusses everything from basic techniques and evidence-based medicine, to fillers, injectables, implants and the psychological aspects of plastic surgery. Additionally, the chapter layout and organization of the Facial Plastic and Reconstructive Surgery Study Guide allows the reader to focus on just those topics relevant to the board exam, making it a must-have for anyone preparing to take the exam.
